socket® mobile

CHS Series 7 & 8
Android & Windows Solutions

Does your business need a fast barcode scanner for Android®, Windows, and Windows Mobile devices?

If barcodes are crucial to your business, don't settle for slow, tedious scanning with a phone camera. Socket Mobile offers a wide range of Android compatible 2D and 1D cordless barcode readers perfect for either basic data entry or advanced data collection with customized features.

Hardware Options

CHS Series 7

- Optimized to be balanced in your hand
- Best choice for tablets, desktop or notebook computers
- Available in multiple colors, performance levels and durability options
- Common development tools (SDK)

Photo: Quiktrak Revoquest

CHS Series 8

- Optimized to slip easily into your pocket
- Best choice for smartphones
- Attach to your smartphone for one-handed scanning solution
- Use attached to device or detached
- Available in 1D or 2D option and Black and White color
- Common development tools (SDK)

Usage Options

The CHS Series 7 and Series 8 support two types of wireless connections to suit different scanning requirements.

Bluetooth HID Mode - Fast and Simple

✓ Check if your device supports Bluetooth HID connections

✓ Works out of the box, no software installation required — easiest way to connect!

✓ Scanner connects like a wireless keyboard

✓ Enters data "as is" into active cursor field of any device application

✓ Ideal for prototyping, proof of concept, and budget approval

Bluetooth SPP Mode - Robust, Advanced Functionality

✓ Works on all Android, Windows, and Windows Mobile devices

✓ Requires installation of SocketScan™ 10 keyboard wedge software (free on Google Play) or application developed with SocketScan 10 SDK

✓ Supports advanced scanner control, data extraction and manipulation

✓ Enables two-way communications with devices

✓ Enters data into any device application, no active cursor field required if using the SDK

✓ Ideal for robust, dependable deployments

Scan to download SocketScan 10 from Google Play!

SocketScan 10 Software Development Kit (SDK)

✓ For developers to embed support for CHS Series 7 and Series 8 into their apps
✓ Use the same API support for scanning with a tablet/phone camera
✓ Supports advanced scanner control, data extraction and manipulation
✓ Libraries and sample(s) code for Android, Windows, and Windows Mobile included
