Honeywell

Integrated Global Positioning System (GPS) technology enables location-based functionality such as turn-by-turn navigation, and route optimization, and the ability to document proof of visitation or service with a time and location stamp.

Adaptus® Imaging Technology 5.0 provides workers with the data capture functionality they need to get the job done quickly and efficiently – whether it is scanning a package for delivery confirmation, tracking inventory, electronically capturing a signature for proof of receipt, or taking a picture of damaged goods.

Just as important as the technologies the user puts to work, an innovative power management system ensures they get battery life that lasts a full work shift, even in wireless, scan-intensive environments.

Rugged, ergonomic and full-featured, the Dolphin 9900 mobile computer is the right choice where real-time information processing and solution reliability is critical to a company's operation.
