Expanding Portability Solutions...

World-class premium mobile projectors with superior contrast, brightness and features

WIDE WD720U
XD700U

Full Flexibility for a Diverse Range of Uses

from conference rooms to lecture halls, floor-standing to ceiling-mounted

Always working to provide superior products, Mitsubishi Electric is delighted to introduce the 700 series of premium-grade mobile projectors. Extremely reliable and easy to use, this projector line-up produces images at the amazingly high contrast of 3000:1 and up to 5000lm brightness. Features such as a long-life lamp (up to 5000hrs) to ensure reliability, an Eco-mode for efficient operation, a simple lens shift function for quick setup/installation, as well as USB/LAN display, remote desktop control and other unique network-compatible functions ensure user-friendly operation wherever used.

High Image Quality

Vivid Colour, 5000lm* Brightness and 3000:1 High Contrast

Features including an impressive 5000lm brightness and a high contrast of 3000:1 allow the XD700U to reproduce clear, sharp images regardless of venue size, be it a large meeting room or lecture hall. Mitsubishi Electric's original colour wheel and BrilliantColor™ are incorporated as well, ensuring life-like colour reproduction. Whether coming from a computer, DVD player or other input source, reproduction of vivid images full of colour is guaranteed.

*WD720U: 4300lm

3000lm

5000lm

Projection of clear, sharp images even in brightly lit rooms

High Reliability & Eco-conscious

Energy-efficient Mode Selection

Models are equipped with selection functions for the lamp, power source and standby mode, allowing each to be set according to the usage environment.

Lamp Mode: Standard / Low
Standby Mode: Low / LAN / Speaker Out / Monitor Out
Auto Power Off: OFF / 5Min / 10Min / 15Min / 30Min / 60Min

Modes can be set and changes made to them by direct input using the operation panel on the projector or via the remote control.

Estimated 5000-hour lamp life (in Low mode)

A longer service life for the projection lamp has been achieved by incorporating an optimal design for lamp temperature control. Benefits include substantial reductions in projector operating costs and the labour required for changing the lamp.

*Lamp life specification is an estimate based on verification under proper conditions and is not the duration of the warranty. Lamp will shut-off automatically when usage reaches the specified estimated maximum lamp hours. Service life may vary widely depending on usage and operating environment and conditions, as well as users' adherence to the maintenance and cleaning procedures provided in the user's manual.

Auto Power Off

If no image signal is detected for a predetermined period of time*, power is automatically turned off, reducing needless power consumption.
 *Time preset by user

Stand-by Wattage under 0.5W*

Stand-by (low) mode power consumption is less than 0.5W, offering increased energy savings and further contributing to environmental preservation.

*When in stand-by (low) mode. At this time, use of the LAN function is not possible.

Unpainted Cabinet (Recyclable)

As an eco-conscious measure to promote recycling, an unpainted projector cabinet has been adopted.

Each mode can be set individually

Energy-efficient modes set using installation setup screen

Installation flexibility & User friendly Presentation

Lens Shift Function (Vertical only)

Simply open the top cover on the projector and use the shift-adjustment toggle to manually shift the lens vertically. This eliminates the need to move the projector to adjust the position of images being projected, enabling the flexibility to install it in virtually any setting environment.

Various Presentation Function

Computer-free Presentation (PC less presentation) [PtG file/JPEG Viewer]

Using "PtG Converter", PowerPoint files can be converted into a special format and saved on a USB storage device. When the USB device is connected to the projector, users can replay slideshows or animation effects using only the projector.

Note: The types of slideshows and animation effects that can be replayed are limited.

JPEG files saved on a USB storage device can be projected in a slideshow.
 Note: Only compatible with JPEG files.

Remote Desktop

When using the LAN Display function, a USB mouse or USB keyboard can be connected to the projector enabling direct access to a computer utilising the Internet or other application.

Quiet 28dB Operation

Projection fan noise can be distracting during a presentation or videoconference. 700 series projectors operate at a significantly low noise level of only 28dB (i.e., in "low lamp" mode). As a result, presentations and conferences can be held without distracting projector noise in the background.

Excellent Sound Projection (10W Speaker+Audio Mix)

Using Audio Mix and the built-in 10W speaker, the voice of the presenter and audio from an external audio source can be delivered simultaneously.

Loud 10W built-in speaker + Audio Mix

USB Display/LAN Display

To use the projector to reproduce images from a computer, a USB cable, LAN cable or commercially available wireless dongle can be used. For displaying images via a LAN, up to four computers can be connected to one projector. The projection screen can be divided into quarters, reproducing all computer screens simultaneously.

Notes:
 1) Only one optional USB Type-A port from a computer can be directly connected to a projector.
 Multiple connections using a USB hub is not possible.
 2) For displaying images via a LAN, network settings are required.
 3) Not all USB dongles are compatible.

Network Connectivity

Projectors are equipped with a RJ-45 LAN terminal for remote operation. Additionally, when used with Crestron RoomView™, integrated control of up to 250 projectors including power on/off control, message display and confirmation of lamp service hours is possible. Mitsubishi Electric 700 series are equipped with AMX Device Discovery for simplified device management and compatible with PJLink™.

The trademark of PJLink is trademark applied for registration or registered trademark in Japan, the United States, and other countries and areas.
